

## WINTER 2012 eBooks

An eBook is an electronic version of the textbook. eBooks are generally offered at a significant savings over the printed textbook and offer features such as highlighting, note taking, and search functionality. eBooks may be purchased with a book voucher where funding is available.

Note: Before selecting the eBook option students are encouraged to review the Digits Rights Management (DRM) requirements located on the MBS website next to each listed eBook. Additional instructional material may be required in addition to the textbook. This material may not be available as an electronic option at this time and may require a separate purchase in addition to the eBook through MBS.
